Inappropriate tone and language RC2

Nanna Bjørnholt Karlsson (Editor)

Editor comment on "Can changes in deformation regimes be inferred from crystallographic preferred orientations in polar ice?" by Maria-Gema Llorens et al., The Cryosphere Discuss., <https://doi.org/10.5194/tc-2021-224-EC1>, 2021

The tone and language of review RC2 (DOI: 10.5194/tc-2021-224-RC2) of this submission (DOI: 10.5194/tc-2021-224) is not in line with a constructive and professional review. Referee reports submitted to The Cryosphere should be aimed at improving and enhancing the publication but not at the expense of professionalism and common courtesy.

We do not condone the suggestion that a submission should be checked by native English speakers, nor do we encourage speculation about co-author contributions (or lack thereof) unless the referee has evidence to back up this claim.
