Author comment on "A generalized photon-tracking approach to simulate spectral snow albedo and transmittance using X-ray microtomography and geometric optics" by Theodore Letcher et al., The Cryosphere Discuss., https://doi.org/10.5194/tc-2021-310-AC1, 2022

Please see the attached document with responses to this review. We also wish to express enormous gratitude and delight for such a thoughtful and thorough review, which brought up things we hadn't considered and helped us reform and improve our modeling approach and the overall quality of our work.
