Comment on tc-2021-350

Elisa Mantelli (Editor)

Editor comment on "On the evolution of an ice shelf melt channel at the base of Filchner Ice Shelf, from observations and viscoelastic modeling" by Angelika Humbert et al., The Cryosphere Discuss., <https://doi.org/10.5194/tc-2021-350-EC1>, 2022

Dear authors,

I have considered the manuscript carefully, and agree with the referees' reports, which I therefore expect to be addressed thoroughly in a revised version of the paper. In order to ease the revision process, I am attaching here an additional set of minor/editorial comments for your consideration.

I look forward to a revised version of this manuscript.

Regards,

Elisa Mantelli
