Author comment on "Arctic sea ice and snow from different ice models: A CICE–SI3 intercomparison study" by Imke Sievers et al., The Cryosphere Discuss., https://doi.org/10.5194/tc-2022-84-AC1, 2022

Dear Jean Sterlin,

Thank you very much for your insightful comments. After considering all reviewers and the editors comments it is clear that argument of the paper is not solid enough and we decided to withdraw. We are however considering altering the paper to a study focusing more on the dynamic differences of the models, for which your comments will be very helpful.

Thanks again for the time and work you have put into reviewing our work.

Best regards,

Imke Sievers, Andrea M. U. Gierisch, Till A. S. Rasmussen, Robinson Hordoir, and Lars Stenseng
