Referee comment on "The Cyclogenesis Butterfly: Uncertainty growth and forecast reliability during extratropical cyclogenesis" by Mark John Rodwell and Heini Wernli, Weather Clim. Dynam. Discuss., <https://doi.org/10.5194/wcd-2022-6-RC1>, 2022

I really appologize for the delay in getting this review back to you.

Please see attached review.

Note that I have clicked the "major revisions" button, but I think that a better solution for the study will be to split it into two separate parts, each of which would need to contain significant additions and be a new submission.

Please also note the supplement to this comment:
