Referee comment on "UNAFLOW: a holistic wind tunnel experiment about the aerodynamic response of floating wind turbines under imposed surge motion" by Alessandro Fontanella et al., Wind Energ. Sci. Discuss., <https://doi.org/10.5194/wes-2021-12-RC2>, 2021

---

Thanks for the response! The changes are satisfactory. One observation the referee would like to point out is the coordinate system shown in the attached figure. I wonder if the direction "y" is into the page or out of the page? Currently, it is out of the page, which does not match the Right-Hand Rule. If that is intended and assumed during the experiments, then keep it. If not, please consider revisiting. Here I am assuming the (dot) symbol represents out of the page direction.
