Comment on wes-2021-145

Anonymous Referee #1

Referee comment on "A new base of wind turbine noise measurement data and its application for a systematic validation of sound propagation models" by Susanne Könecke et al., Wind Energ. Sci. Discuss., <https://doi.org/10.5194/wes-2021-145-RC1>, 2022

This is a very well written paper. It clearly shows that the numerical predictions work well against experimental data. The authors did a very thorough study on the validation and parameter study. I recommend the publication of this paper.
