Author comment on "Damping Identification of Offshore Wind Turbines using Operational Modal Analysis: A Review" by Aemilius A. W. van Vondelen et al., Wind Energ. Sci. Discuss., <https://doi.org/10.5194/wes-2021-41-AC1>, 2021

---

Thank you for your positive and constructive feedback, which is very useful for us in improving the quality of the paper. Regarding the following comment:

>>As a negative point, it can be said that the fact that the work is focused in offshore wind turbines it is not always clear, which originates from >>the structural similarity to onshore wind turbines. The text would benefit from a small mention to the onshore counterparts, though this is >>not mandatory.

A clarifying mention was made to the onshore counterparts in the introduction, specifically line 105 on Page 4.

Please also note the supplement to this comment:
