Dear Amir,

Thank you for handling the submission of this paper. Both reviewers have provided excellent suggestions for improving this paper and we look forward to submitting a revised manuscript which incorporates their suggestions.

In order to allow us to fully address all comments, we request a decent amount of time to work on revisions. We would therefore suggest that these be treated as 'major corrections' with regards to the time allowed for preparation of the revised paper.

If any of our responses to reviewers need clarification, we'll be very happy to provide further information.

Best,

Edward Hart
